

ONE CLICK WEB RECORDS

ABSTRACT OF THE DISCLOSURE

A method, system, computer medium, and other embodiments for integrating unrelated
5 web services with stand-alone media-based devices are provided. Users can access and control
the media-based device conveniently with a web-browser through various portals on the Internet.
In an embodiment directed to a single web session, users program the media-based device by
clicking on one or more hyperlinks or hypertexts in the form of advertisements of upcoming
broadcasts. The advertisements may be web-hosted or sponsored by web portals.
